

Location Screen

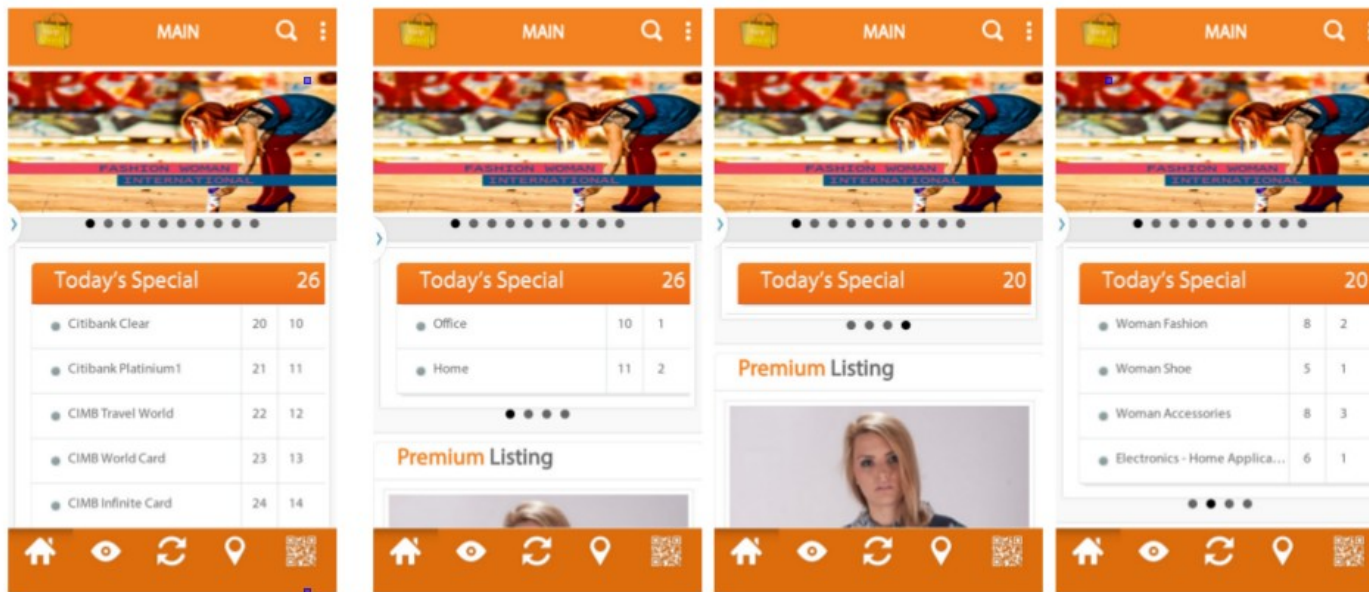

The location filter still do not list those without GPS data.

Location Filter Show only those witch have GPS data.

Because Location Filter main requirement is show only near by location list

Thats why we filter only location within the location range

(Right now Location nearby range is 10km)

- Is this working already?
- Does your programmer knows what each number should represent?
- Listing by Cards
- It should work this way:
 - Today Special 26
 - 26 Listing Nearby are Today's Special are for all the selected card
 - Citibank Clear 20 10
 - 20 Listings nearby are for Citibank Clear

- Listing by Locations
- It should work this way:
 - Today Special 26
 - Means 26 Listing are Today's Special
 - Office 10 1
 - 10 Listings nearby to Office
 - 1 Listings nearby to Office are for Today's Special

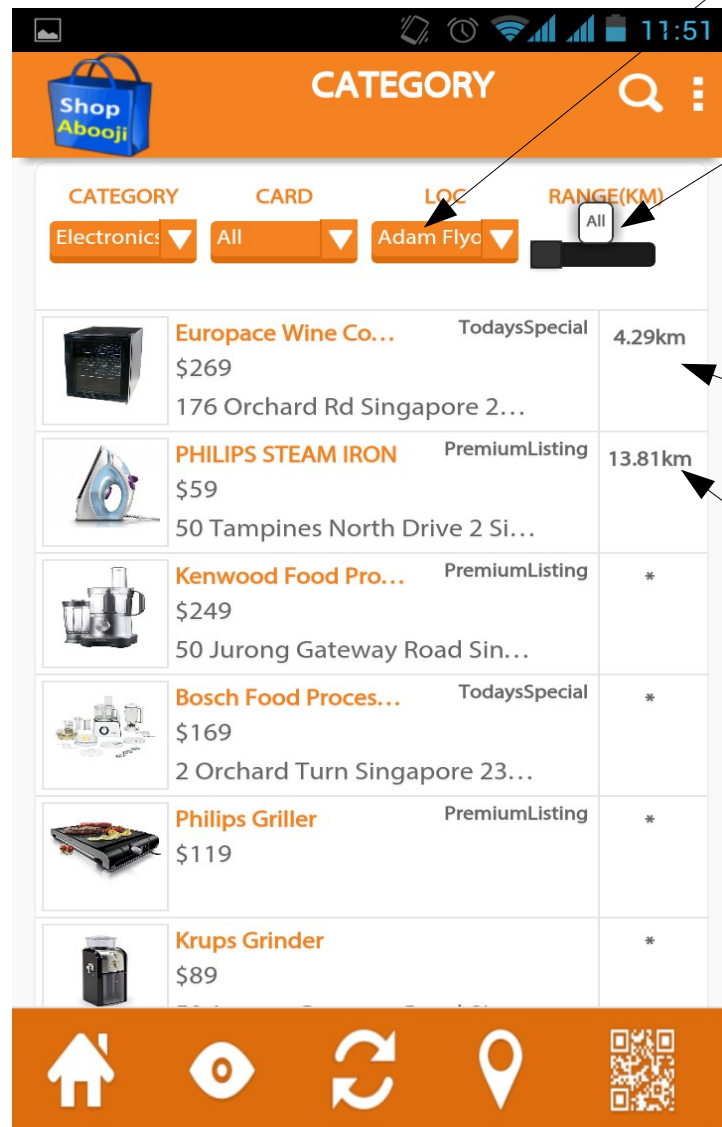

- Listing by ??

- Listing by Category
- It should work this way:
 - Today Special 20
 - Means 20 Listing Nearby are Today's Special
 - Office 10 1
 - 10 Listings nearby to Office
 - 1 Listings nearby to Office are for Today's Special

instructions
given in
Previos
document

new issues like for range = "All" no longer shows listing outside the maximum range.

In this screen it display all list with 2 with GPS location
Maximum range is 10 and one list show 13.81

Adam Flyover Singapore

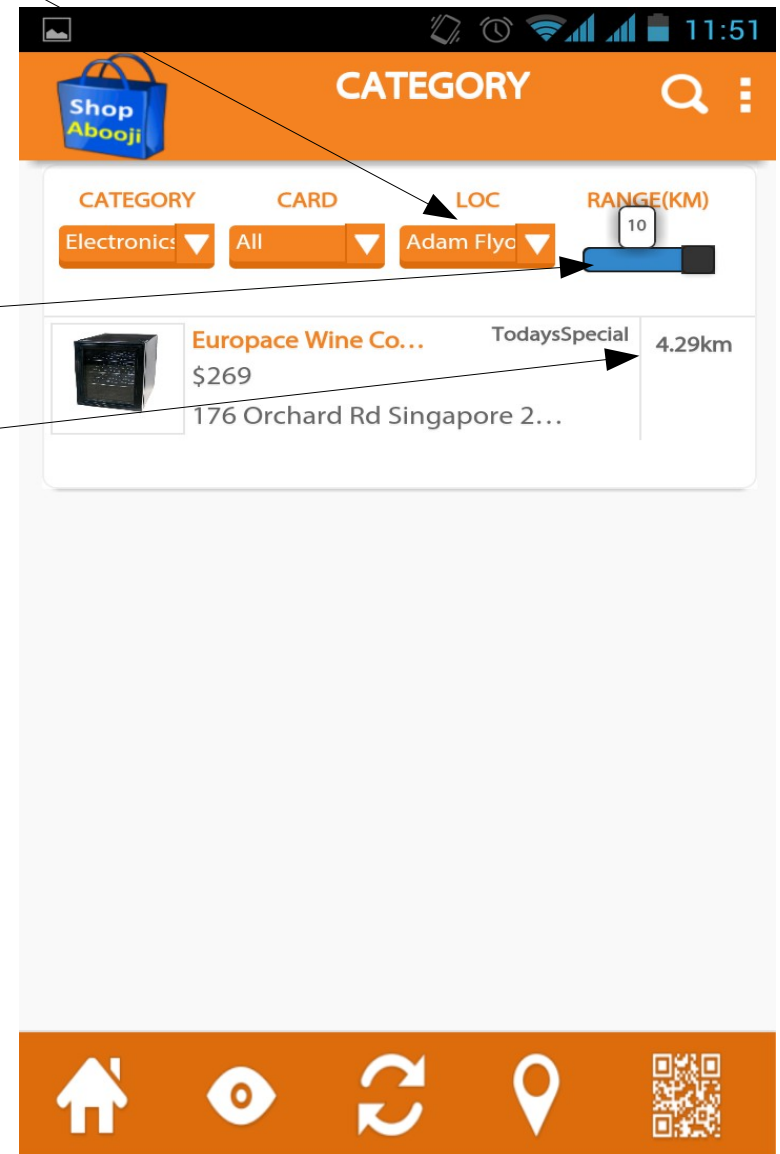

Range = All

Range = 10

4.29Km

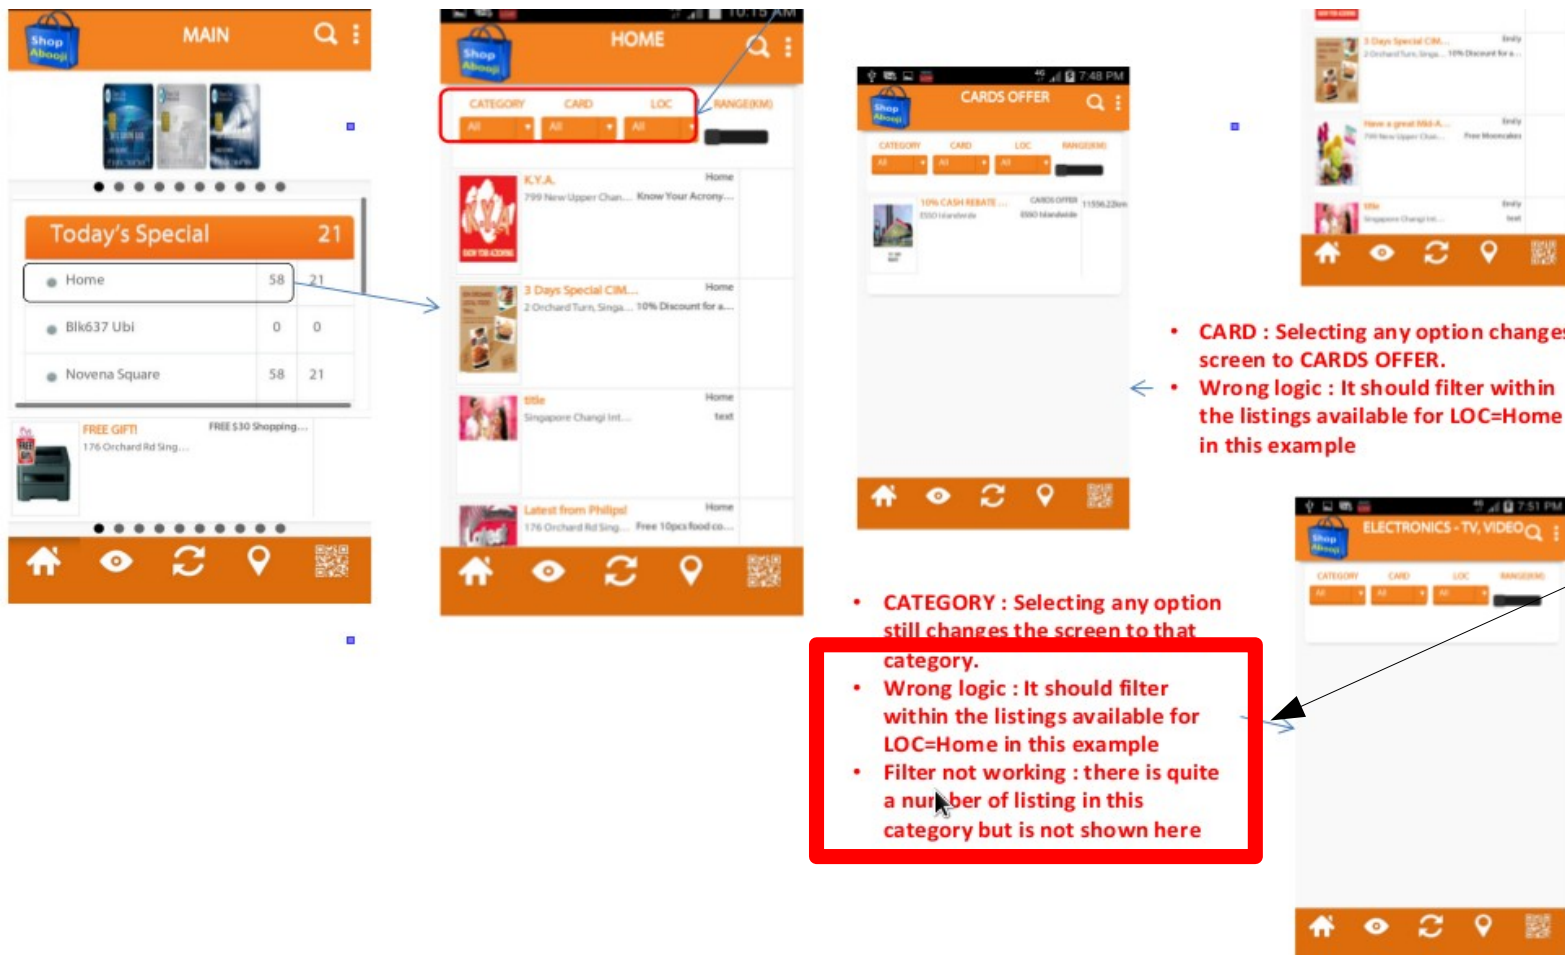

13.81Km

After Change Range to 10
its only show 1 list with 4.29Km from
location

Note:

- 1) In Location Nearby range is set to 10km so it's only show list with GPS data and under 10Km from that location
- 2) On location listing When set to all in range it still show List under 10Km because that is Requirement for LOCATION LISTING. As previously send document after select list all filter apply to only that list only

Instruction Given in previos document that After select List All filter are apply to inside that list only
